

I am outraged and horrified that nothing has been done to stop Sinclair Broadcasting from their extremely biased behavior and reporting. First, they won't air Nightline when that show ran a program honoring our fallen soldiers, then they pre-empted, with no notice, a 60 Minutes show in which President Bush's National Guard record was going to be discussed. There have been other suspicious spontaneous pre-emptings when the content of a particular show is in opposition to Sinclair's obvious biased political agenda. Now they intend to run what amounts to a 60 minute commercial against John Kerry in violation of the Federal Election Laws and FCC rules. This is just too much. In some places in west Virginia, this is the only local news people can receive by television. The people of west Virginia deserve to receive unbiased news reports and to be able to watch the same uncensored television shows that the rest of the country is able to watch. Sinclair obviously thinks west Virginians are a bunch of uneducated hicks who can't think for themselves and have to be told what to think. Sinclair seems fearful that if west Virginians are given the straight facts, we will come to the conclusion that Sinclair and the radical right is just wrong.
